**MAXIMUM PERFORMANCE  
MINIMUM MAINTENANCE**

**CBX750F**

In creating our third generation transverse 750 four, for the inline engine, we set ourselves two targets: high performance and low maintenance. The high performance is there in the form of 51PS from the all-new double overhead camshaft 16-valve motor but the maintenance isn't.

You see, the all-new CBX750F has maintenance-free hydraulic tappets, automatic camchain, tensioner, hydraulically actuated clutch and transmission ignition.

Even the brushes, fan-cooled alternator. And that's tucked away behind

the cylinders to keep engine width down to a minimum: a mere 429mm.

For maximum handling and road-holding performance, the CBX750F is equipped with 39mm air-assisted front forks with 3-way adjustable rebound damping, TRAC anti-dive, a fork brace and a 15" front wheel for increased steering response, while at the rear there's single-shock Pro-Link suspension with 3-way adjustable rebound damping and a lightweight box-section swingarm.

And for maximum braking performance there is a triple disc brake system using sintered metal pads.

**CBX550F F2**

Also designed for maximum performance are the top-selling CBX550F and its fatred brother the CBX550F2, both a stunning blend of high power and excellent handling. The four cylinder double overhead camshaft 572cc 16-valve engine produces 66PS, while air-adjustable front forks with TRAC anti-dive, single-shock Pro-Link rear suspension, and triple inboard ventilated disc brakes ensure maximum handling and braking performance.

Race 9—MCN/Avon Production T.T. Race

Lap Record: 103.13mph—Roger Nicholls (900 Ducati) 1976

**TT Mountain Course Speed Table**  
 The times in these Speed Tables are calculated to the nearest second and consequently do not constitute a completely accurate guide as the Official Timekeepers record split seconds.

Average Speed (mph)	1 lap	2 laps	3 laps	4 laps	5 laps	6 laps
80	28.18	56.36	1.24.54	1.53.11	2.21.29	2.49.47
