BUT WHAT'S IT FOR?

by Nevil Lloyd

"BUT what's it for?" asked the Marketing Manager of the assembled group of white coated lubricating technologists who had just informed him that after many years of research and experiment (during which time they had worn out more white coats than a certain famous lady had had motor accidents) that MOLYSLIP had been invented. "Unless you can tell me what it's designed to do," he continued, shielding his eyes with one hand, as he had a horror of being blinded by science, "you'll take the wind right out of my Sales Department."

There was silence in the laboratory, broken only by the steady hiss of a Bunsen Burner, burning another Bunsen.

Here indeed was a problem; a big problem. A problem of such magnitude that, by comparison, made Neubauer look like Wee Georgie Wood. All eyes turned towards the Senior Scientist, a man of brilliant attainments and known to his staff as Compass Charlie as he too had 360 degrees. But it was plain to see that he had lost his bearings.

"I wish we'd invented something simple, like the V16 B.R.M. or the Monte Carlo Rally Regulations," grumbled one

of the junior technologists who carried his passion for fried potatoes to such lengths that he always had a chip on his shoulder.

Once more it was the Lab. boy who came to the rescue. (Our regular reader will remember that due to a laughable oversight he had got mixed up with the refining process that produced MOLYSLIP; an experience that had left its mark in several ways, one of which was a tendency to spell Ferrari with two small ff's). His suggestion that sample tins of MOLYSLIP be sent to a selected list of people with a request that they report upon its uses was adopted unanimously.

The response was gratifying; one correspondent claimed it was an ideal preparation to shorten the visit of female relatives to one's home. In this particular instance the writer's mother-in-law was the subject of the experiment. With the aid of a paint brush a liberal coating of MOLYSLIP was applied to the top step of the staircase. In less than 5 minutes MOLYSLIP worked wonders. To quote the writer "... coming down to breakfast she molyslipped on the top of the stairs, and the poor old soul fell molybdenum over disulphide right down to the bottom. The funeral is on Friday."

MOLYSLIP for 4-Stroke Engines. Specially formulated to reduce friction, MOLYSLIP gets the best out of petrol and oil to give you peak power performance. A 4 oz. tin costing 7/6d. will last for many thousands of miles.

MOLYSLIP 'G' for 4-Stroke and 2-Stroke Gear Boxes and Transmission and Chain Drives. You'll find gear-changing becomes silky-smooth when you use MOLYSLIP 'G'. The 4 oz. Injector flask costs 7/6d. and is sufficient for months of trouble-free riding.

From HALFORDS and all garages.

MOLYSLIP—for peak power performance
