PROGRAMME

GOLDEN VALLEY MOTORCYCLE CLUB

SHELL OILS.

BRITISH BIKE

BONANZA.

JULY 1st 1984.

**MOORHOUSE FARM,
BRIMPSFIELD.**

**By kind permission of:
MR. K. BROADSTOCK.**

SEE the gleaming classic machines, as they should be. Our contemporary photo-library vividly recalls the days when these motorcycles dominated the streets. By concentrating on authentic nostalgia we show the veteran, vintage and post-vintage motorcycles in living action, not just as museum pieces. We also feature the riders of the classic eras, written by the most celebrated writer in this field, Bob Currie, in his usual fascinating prose.

The rally car

as Shell Oils see it.

To Shell Oils, a rally car is simply a test tube on wheels. A test tube for proving in practice what our scientists tell us in theory.

Development starts with a laboratory stage that lasts about three years, working at temperatures from -30°C to 250°C .

From the test tube, new oils are driven $6\frac{1}{2}$ million miles in stationary test engines and real cars.

Work on new oils takes place at Thornton Research Centre, near Chester. And Thornton's efforts make us successful in motor sport year after year.

And because we give our oils such a rough ride, you can be sure of a smoother one.

 **Shell Oils**
No oils are driven harder
