REEDER GASPRING™

**For a twenty minute moto
or a twenty minute cruise**

You decide. We'll tell you though, the Gaspring was designed to give you optimum riding performance on the open road or dirt track.

It's a light weight air spring that bolts on to your present shock (fits most models) giving you uncanny control and the cushion-ride comfort of a feather bed.

The Gaspring has a unique progressive spring rate that's quickly adjustable (with a tire pump) for any riding condition. Whether you're cruising or competing simply add or bleed air until you get the desired pressure. It's all up to you and the type of ride you want.

For more information on the Gaspring contact us and we'll send you everything you want to know.

Already these motorcrossers have been setting the pace throughout Australia, a pace that's proved too much for the opposition. Yamaha already have the score on the board with Australian championships in 1975 and many other State titles.

First with exclusive 'Monoshock' rear suspension, Yamaha introduce gas filled front forks to their range of motorcrossers, so this year looks another great Yamaha year.
