## WORKS FOR THE CR250R. WORKS FOR THE CR125R TOO.

The all new, head turning Honda CR125R has the look of a true champion. The innovative lightweight twin spar aluminium frame features dual box section twin spars strong enough to take on the toughest circuit, providing remarkable handling at racing speed.

We've modified the engine too, and given it a 5-speed gearbox for a more comfortable range of shifting ratios.

Exhaust valve size and shape have been changed for increased power output. New ignition timing and cylinder port timing give better high r.p.m. feel, whilst new flexible reed valve improves throttle response with better low to mid-range control.

Bolt that lot into a frame that's based on the current world champion CR250R and you've got a gutsy, unbeatable combination that'll have the competition eating dirt.
